ALLOWANCE

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Cupar on 9/13/10.

The application has been amended as follows:

Claim 1 is amended as follows:

An interactive ~~object~~ key identification system comprising:

interactive user interface means for manually typing at least one specified variable that is an intended use of a first ~~object~~ key into at least one input field of a plurality of input fields to narrow the number of key blanks that match the intended use, wherein at least one of said plurality of input fields in the interactive user interface means includes at least one specified variable as an identification of an intended use of said ~~object~~ key, said specified variable being known or physically observed based upon a visual inspection of the ~~object~~ key by a user of the system;

database means for matching a ~~master-object~~ key blank through comparison of known values in response to the specified variable manually typed into the interactive user interface means; and

a display rack for holding a physical set of ~~master objects~~ key blanks and an indicator for distinguishing the identified ~~master object~~ key blank from the physical set of ~~master objects~~ key blanks.

Claim 4, line 3, delete the phrase "master object" and insert "key blank"; and delete the word "objects" and insert "keys."

Claim 11, lines 2 and 3, respectively, delete the phrase, "master object" and insert "key blank."

Cancel claims 12 and 13.

Claim 16, lines 2 and 3, respectively, delete the phrase, "master object" and insert "key blank."

Claim 19 is amended as follows:

An interactive ~~object~~ key identification system comprising: a computer having: (i) an interactive graphical user interface for manually typing at least one specified variable that is an intended use of a first ~~object~~ key into at least one input field of a plurality of input fields to narrow the number of key blanks that match the intended use, wherein at least one of said plurality of input fields in the interactive graphical user interface includes at least one specified variable as an identification of an intended use of said ~~object~~ key, said specified variable being known or physically observed based upon a visual inspection of the ~~object~~ key by a user of the system, and (ii) a database

Art Unit: 2179

for matching a ~~master object~~ key blank through comparison of known values against the specified variable manually typed into the interactive graphical user interface, and in response said computer producing an output signal indicative of the identity of the ~~master object~~ key blank to a display rack; and

a said display rack for holding a physical set of ~~master objects~~ key blanks and an indicator for distinguishing the identified ~~master object~~ key blank from the physical set of ~~master objects~~ key blanks in response to the selection of the specified variable, which receives the output signal and presents information to the user about the identified ~~master object~~ key blank.

Claim 21, line 2, delete the phrase “master object” and insert “key blank.”

Cancel claim 23.

Claim 26, lines 2 and 3, respectively, delete the phrase “master object” and insert “key blank.”

Claim 28, line 2, delete the word “object” and insert “key.”

Cancel claim 29.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 19 when considered, as a whole in light of the specification, is allowable over the prior art of record. Specifically prior art of record fails to teach or suggest the limitations of "interactive user interface means for manually typing at least one specified variable that is an intended use of a first key into at least one input field of a plurality of input fields to narrow the number of key blanks that match the intended use and matching a key blank through comparison of known values in response to the specified variable manually typed into the interactive user interface means."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shashi K. Becker whose telephone number is 571-272-8919. The examiner can normally be reached on Mon-Fri 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on 571-272-4847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
